

Camper profile 2019

You may also complete this form online at btcamps.org/profile

Camper's name:  _____

Information provided on this profile will be shared with the camper's Unit Head, counselors, nurses, and instructors, as necessary. By combining this written Camper Profile with any additional information you may orally give your child's counselor, we'll have a better idea of how to best serve your child.

1. Please discuss any behavior or emotional problem that has been a concern at school or home in the past year.
2. List several adjectives that you would use to describe the camper's usual relationship with and behavior toward his/her peers (not adults).
3. If there has been any recent change in medications or restrictions, please indicate those changes here. (Note: It is also the parents' responsibility to notify the camp if any change occurs during camp.) We strongly recommend that campers continue any medications taken for hyperactivity or attention deficit during camp.
4. Describe how you perceive the camper feels about attending camp this summer.

Swim philosophy

During both instructional and recreational swim times, all campers are required to stay at the pool with their unit. Of course, our swim instructors will never coerce or force a camper to get into the water. But there are levels of encouragement. Check the statement that most closely represents your feelings on the subject.

- My child usually needs an extra push to get over a hurdle. So please be gentle, but firm. I expect to see some real progress in swimming skill.
- I send my child to camp primarily to have fun. Skill acquisition is important, but not my highest priority. So even though s/he is required to go to daily swim class, don't use any pressure during swim instruction. If progress is slow, so be it.
